In the Matter of  
Creation of Low Power FM radio service

MM Docket 99-25

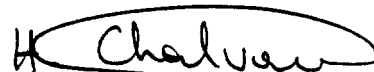

I support the creation of Low Power FM radio service. LPFM stations can provide a great local service to the communities they are located in.

As part of my Comment in supporting LPFM, I like the Commission to take the following proposals in consideration:

- 1- No entity should be allowed to own more than 1 LPFM station.
- 2- both non-profit and for profit entities should be allowed to own LPFM stations.
- 3- LPFM stations should be allowed to broadcast commercials.
- 4- both 2<sup>nd</sup> & 3<sup>rd</sup> adjacent channel restrictions should be dropped for LP10 & LP100 stations because of their low powers.
- 5- the "minimum operating hours" requirement should not apply to LP10 & LP100 stations.
- 6- The EAS requirements should not apply to LP10 & LP100 stations.
- 7- the Commission should use a different method predicting interference for LPFM stations and not use it's strict mileage separation tables or else, many large cities will not have any LPFM station.

Conclusion:

I strongly urge the Commission to adopt its Proposed Rule regarding the creation of LPFM service.
